## Work placement in Hospitality

Work placement is a mandatory HSC requirement within the Hospitality Curriculum Framework and minimum hours have been assigned to HSC VET courses within the Framework.

Learning in the workplace will enable students to:

- progress towards the achievement of industry competencies
- develop appropriate attitudes towards work
- learn a range of behaviours appropriate to the industry
- practise and apply skills acquired in the classroom or workshop
- develop additional skills and knowledge.

## Work placement requirements

Work placement is to be undertaken in an appropriate hospitality environment.

Students must complete the following work placement for Hospitality Curriculum Framework courses:

Hospitality Framework course	Minimum work placement requirement
Hospitality (120 indicative hours)	35 hours
Hospitality (240 indicative hours)	70 hours*
Hospitality Specialisation Study (60 indicative hours)	additional 14 hours
Hospitality Specialisation Study (120 indicative hours)	additional 35 hours

\* For the 240-hour course only, it is permissible for up to 50% of work placement to include school and community functions where students cater for and/or service customers.

The 'work environment' of the functions should be authentic and as far as possible reproduce and replicate a hospitality workplace or work environment. Tasks, activities and conditions need to be as close as possible to real-life situations. There should be industry-realistic ratios of staff to customers, as well as sufficient customer traffic that allows students to deal with a range of customers with varying needs and multiple hospitality service or operational tasks simultaneously. The speed, timing and productivity for tasks should be typical of a commercial operation.

Students undertaking these courses as part of a school-based apprenticeship or traineeship will meet the mandatory work placement hour requirements through the on-the-job training component of the apprenticeship or traineeship.

Non-completion of work placement is grounds for withholding the HSC course. Schools and colleges are advised to follow the procedure for issuing of 'N' determinations as outlined on the NSW Education Standards Authority (NESA) [Assessment Certification Examination \(ACE\) website](#).

## Work placement and part-time work

Recognition of Prior Learning (RPL) may be granted for mandatory work placement requirements. Students' outside employment (ie not under the auspices of the school) may be recognised towards the requirement for work placement in a VET course ([ACE 8051](#)).

## Work placement implementation

The scheduling of work placement should reflect student readiness and complement off-the- job learning programs.

Teachers should use their professional judgement in the selection of relevant work placements in related industry areas and the mix of hospitality-specific and more general workplace experience undertaken by each student.

Work placement should occur in appropriate workplaces within the hospitality industry. For example:

- aged care facility
- bed and breakfasts

- bistros
- cafes
- function centres/conference rooms
- government offices/other workplace canteens with commercial kitchens
- hospitals
- resorts
- RSL and sporting clubs
- small to large hotels and motels
- small to large restaurants
- armed services catering facilities
- cruise liners
- flight catering.

For units of competency that must be assessed in a hospitality work environment, work placement provides an opportunity to collect evidence required for a student to be deemed competent. Work placement also provides an opportunity for students to undertake 'service periods' for the collection of evidence of work performance required by the holistic units of competency.

## Principles underpinning work placement in the Higher School Certificate

NESA has formally endorsed the following principles relating to work placement in Higher School Certificate (HSC) VET courses.

### Preamble

Industry curriculum frameworks have been developed to provide students with the opportunity to gain credit towards the NSW HSC and credit towards national vocational qualifications under the Australian Qualifications Framework.

Industry curriculum frameworks are derived from national Training Packages. Courses within the frameworks specify the range of industry-developed units of competency from the relevant Training Packages that have been identified as suitable for the purposes of the HSC. VET courses in industry curriculum frameworks are aligned to national vocational qualifications.

Although not all Training Packages mandate work placement, it is a mandatory HSC requirement of each course within the frameworks. Indicative hours have been assigned to the work placement requirement for each course.

The following principles should be read in conjunction with any school system's documentation relating to work placement.

### Principle 1

Work placement must have a clearly articulated and documented purpose. The structure of the work-based learning experience needs to be planned and developmental.

A range and number of purposes are possible, including, for example:

- learning about a particular industry, workplace culture and career opportunities
- practising skills learnt off the job
- developing new skills
- improving work-related skills
- developing skills including employability skills such as teamwork, using technology and problem-solving
- achieving entry-level competencies
- achieving workplace performance of particular competency standards
- assessing in a realistic environment or allowing for holistic assessment
- providing opportunities to build skills in a developmental manner from the simple to the complex
- providing opportunities for the learner to reflect on the workplace learning experience in the context of individual current knowledge and understanding
- encouraging students to undertake further education and training.

### Principle 2

The scheduling of the work placement should reflect student readiness and should complement off-the-job learning programs.

The scheduling of the work placement should take account of:

- whether or not students are workplace-ready in terms of the competencies they will need to develop and demonstrate in the workplace
- how the timing of the work placement links to overall course planning
- the degree of flexibility available at both the workplace and the school
- how the alignment of both on and off-the-job competencies can be best achieved.

An individual work placement program focusing on a developmental approach should be negotiated with the workplace supervisor/employer. This approach should focus on students moving from simple to more complex tasks. Dependence on supervision should reduce over time as students move towards greater independence in the workplace. The ultimate goal of a work placement should be competence and autonomy in the range of tasks required for the job being undertaken.

### Principle 3

Work placement should be relevant to the VET courses being undertaken.

The 'real' tasks being undertaken in the workplace should complement the tasks and learning being undertaken by the students in their VET courses at school. Work placement may also provide students with the opportunity of having learning outcomes/units of competency assessed in the workplace by accredited trainers and assessors.

### Principle 4

Work placement can provide opportunities for work-based assessment.

Not all industry curriculum frameworks specify that it is mandatory for competencies to be assessed in the workplace. Assessment events should relate to overall course planning and the purpose of the work placement. In a competency-based course, assessment of competencies is criterion-referenced. This means that a participant's performance is judged against a prescribed standard – not against the performance of other participants.

The purpose of assessment is to judge competence on the basis of performance against the performance criteria set out under each element of competency. A participant is judged either competent or not yet competent.

Competency-based assessment is based on the requirements of the workplace. Competence incorporates all aspects of work performance, including problem-solving and the capacity to apply skills and knowledge in both familiar and new situations. Assessment of competence involves the assessment of skills and knowledge combined.

Assessors should adopt an integrated or holistic approach to assessment. This means that a number of elements of competency or even several units of competency are assessed together. This method of assessment is encouraged in line with the concept of competence as the integration of a wide range of skills, knowledge and attitudes.
